Andrii P.

Frontend Developer
Chișinău, Moldova

Summary

I build frontends that work — fast, predictable, state-driven, and built on a clear mental model of how data flows through the system. In my current role I rebuilt the entire frontend of a FinTech platform from the ground up using Nuxt 3, Vue 3, TypeScript, Pinia, UnoCSS, and a contract-first approach.

My strength is turning chaos into structure: messy requirements → clean flows, unclear backend responses → typed schemas, inconsistent UX → predictable UI.

Before engineering I earned a Master's in Dentistry, which gave me discipline, precision, and the ability to work under pressure — surprisingly useful traits in software. Along the way I built internal tools and automations with Google/Slack/Jira/Telegram APIs and wrote code in JavaScript, TypeScript, C#, C++, and Arduino.

Today I'm focused on becoming a top-level frontend engineer, mastering architecture, and building interfaces that feel effortless to use.

Experience

Sirius.expert
Frontend Web Developer
December 2024 - Present (1 year)
Chișinău, Moldova

Currently building the frontend for a SaaS FinTech platform at Sirius, using Vue.js, Nuxt 3, and TypeScript to deliver a smooth and consistent experience across devices.

Work closely with the product designer in Figma to turn design concepts into accurate, responsive layouts.

Implement modular, reusable, and scalable components, following modern JavaScript, HTML, and CSS best practices, using UnoCSS, Tailwind, and Pinia for state management.

Optimize performance through Lighthouse, Largest Contentful Paint (LCP), and other Core Web Vitals, keeping load times and interactivity fast.

Contribute to architecture design and maintain clean, readable, and maintainable code.

Integrate PostHog for analytics and user behavior insights, and Sentry for real-time error tracking and monitoring.

Use Orval to auto-generate typed API clients, improving code reliability and minimizing manual maintenance.

Participate in code reviews, refactoring, planning, and Agile sprints, supporting rapid iteration and serving as a bridge between backend and design teams.

NDA

Technical Support Specialist

November 2021 - September 2024 (2 years 11 months)

Кишинёв, Молдавия

Technical Expertise:

Proficient in diagnosing and resolving complex technical problems, ensuring minimal downtime and maximum customer satisfaction.

Skilled in guiding customers through troubleshooting steps and providing clear instructions for independent issue resolution.

Experienced in collaborating with cross-functional teams to improve product usability and drive continuous improvement initiatives.

Key Responsibilities:

Provide timely technical support via email and chat, ensuring a seamless customer experience.

Document and maintain records of customer interactions and technical issues in a comprehensive ticketing system or knowledge base.

Stay up-to-date with product knowledge and industry trends to deliver accurate and relevant support.

Collaborate with internal teams to escalate and resolve technical issues promptly, contributing to overall customer success.

Global Voyager Assistance
Insurance Coordinator
March 2019 - May 2021 (2 years 3 months)
Odesa, Odessa, Ukraine

Education

Odessa National Medical University
Master's degree, Dentistry · (September 2013 - August 2018)
